Samsung air conditioners are renowned for bringing cutting edge technology to you, but they also feature designs that complement your lifestyle.

Don't believe us, trust the bevy of international awards that recognise our design pedigree.

This amalgamation of mesmerising designs and intelligent innovations is what makes them unique, for they not only keep you comfortable, while being energy efficient, but they also look good while they are at it.

With Samsung air conditioners discover a way of life that is cool, convenient, and chic.

1 Stay comfortably cool without feeling cold

WindFree™ cools gently and quietly without the unpleasant feeling of cold wind on your skin, as it disperses air through 23000 micro air holes.

3 Automatically cools more efficiently

The user can control the direction of the wind. The motion detect sensor starts detecting 5 mins after turning on. If there is no movement after 20 mins it will automatically switch to the **WindFree™** mode to save energy.

5 Remotely control it anytime, anywhere

Using the SmartThings App* you can remotely control and monitor the air conditioner with just a touch. Or simply tell artificial intelligence (AI) system what you want and it does it. It even suggests the best settings.

2 Enjoy a more intelligent way of living

AI auto cooling feature automatically optimizes the cooling by analyzing the usage behavior. Based on your preferred temperature and the outside temperature, it automatically switches to the most appropriate mode.

4 Low noise levels

Super Silent Samsung air conditioner works much more smoothly and quietly as its stable operation produces less vibration and noise.

6 Reduces energy use by 77%^ to save money

The compressor and the indoor fan operate efficiently to maintain the desired temperature, thus using minimum energy.

*Available on iPhones and Android devices. A network connection is required. Samsung application account is necessary. ^Tested on the AR12TY5AAWK model, based on the power consumption of Fast cooling mode vs WindFree cooling mode.

7 Easy to clean anti-bacterial filter

Keep your air conditioner working efficiently with less effort. The Easy Filter Plus is located outside, on the top, so it can easily be taken out and cleaned. Its dense mesh keeps the Heat Exchanger clean and an anti-bacterial coating helps protect you against dangerous airborne contaminants*.

8 Stable and durable in harsh conditions

Enjoy a long - lasting performance in challenging environments. Triple Protector Plus technology prevents damage from power surges and fluctuating electrical currents. Its anti-corrosion coating also protects the condenser and cabinet in harsh conditions.

9 Simply cleans itself

Keep the inside of your air conditioner hygienic by doing nothing! After it has been working, the Auto Clean function automatically dries the Heat Exchanger using a 3-step process. It removes moisture by blowing air for between 10 to 30 minutes. So it prevents the build-up of bacteria and odors.

10 Designed to cool faster, wider and farther

Save money every day with highly energy-efficient Digital Inverter Boost technology. It maintains the desired temperature with less fluctuation. It also has neodymium magnets and a Twin Tube Muffler, so it works efficiently, quietly and lasts much longer. And it reduces energy usage by up to 77%^.

*Tested in Korea Test lab. Data has been measured under specific testing conditions and may vary depending on environmental factors and individual use. ^Tested on the AR12TY5AAWK model, based on the power consumption of Fast cooling mode vs WindFree™ cooling mode.

1 Controlling the cooling capacity

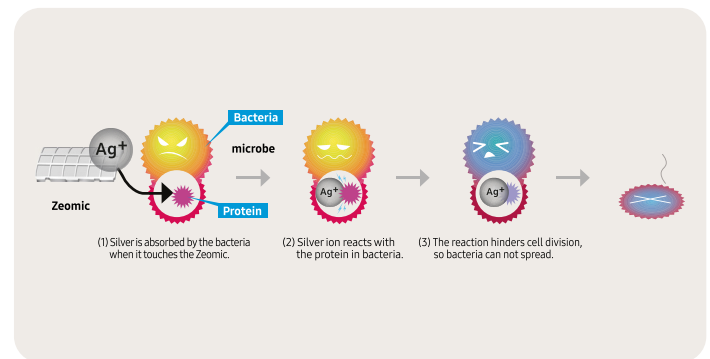

Powered by innovation, in the convertible mode cooling can be adjusted according to the number of people in the room. This helps to maintain a pleasant atmosphere and save energy. The 2.0T capacity gets converted to 1.5T, 1.5T gets converted to 1.0T and 1.0T gets converted to 0.8T.

2 Works smart, saves energy

An energy-efficient Digital Inverter 8-Pole maintains the desired temperature without frequently turning off and on. So it uses less energy* and helps you stay comfortable for long periods.

3 Easy to clean anti-bacterial filter

Keep your air conditioner working efficiently with less effort. The Filter Plus is located outside, on the top, so it can easily be taken out and cleaned. Its dense mesh keeps the Heat Exchanger clean and an anti-bacterial coating helps protect you against dangerous airborne contaminants^.

4 Keeps comfortably cool

The 2-Step Cooling Mode begins cooling the air fast using its Turbo cool mode. It then automatically changes to Comfort Cool mode to maintain the desired temperature, so don't have to keep changing the settings.

*Tested on the AR12TY5AAWK model, based on the power consumption of Fast cooling mode vs WindFree cooling mode. ^Tested in Korea Test lab. Data has been measured under specific testing conditions and may vary depending on environmental factors and individual use.

5 Stable performance

The Voltage fluctuation protector delivers a long lasting performance with advanced durability and protection from power surges. The triple protector technology protects the AC against sudden voltage surge or drop. Operating range (130 Vac to 290 Vac)

6 Removes excess humidity

The dry mode acts as a dehumidifier and removes excess humidity from the room without lowering the temperature significantly.

7 Long-lasting cooling

The Copper condenser is made of corrosion-resistant material to protect the condenser from rusting, which helps to maintain the optimal performance of the Heat Exchanger.

8 Seamless installation experience

Smart installation provides confirmation to the user through the digital display after service and set up is complete.

9 Stays fresh

When the air conditioner is turned off the Auto Clean function automatically runs a fan to remove dust and moisture in the heat exchanger. So it stays clean and dry, which prevents the growth of bacteria and mildew.

10 Enjoy a good sleep

Good Sleep mode automatically controls and fine-tunes the temperature to create the ideal conditions for each stage of the sleep cycle.

1 Long-lasting cooling

The Copper condenser is made of corrosion-resistant material to protect the condenser from rusting, which helps to maintain the optimal performance of the Heat Exchanger.

2 Cools you faster

Cool a whole room rapidly and effectively. Turbo cooling mode operates with the fastest fan speed, before slowing down. So it cools much faster compared to the normal mode and reaches the desired temperature in the shortest time.

3 Removes excess humidity

The dry mode acts as a dehumidifier and removes excess humidity from the room without lowering the temperature significantly.

4 Stays fresh

When the air conditioner is turned off the Auto Clean function automatically runs a fan to remove dust and moisture in the heat exchanger. So it stays clean and dry, which prevents the growth of bacteria and mildew.

5 Breathe purer air

Anti-dust and Bacteria Filter is really effective at capturing dust, airborne contaminants and allergens, such as pollen, mold spores and pet dander.

6 Enjoy a good sleep

Good Sleep mode automatically controls and fine-tunes the temperature to create the ideal conditions for each stage of the sleep cycle.

1 Evenly circulates and cools every corner

Unlike 4-way, cassette type air conditioners that create areas of uneven airflow where cool air can't reach*, a circular outlet blows cool air in all directions, so every corner of a room is the same temperature**.

2 Comfortable cool, not unpleasantly cold

A bladeless design softly disperses cool air across the room, making you comfortably cool without feeling a cold draft*. With no blades to block the air flow, it also expels 25% more air^ and spreads it farther.

3 PM1.0 Filter

The PM1.0 filter is not only effective at capturing ultrafine dust of up to $0.3\mu\text{m}$ in size, but it also sterilizes up to 99% of the bacteria trapped by the filter using an electrostatic precipitator.

4 Circular design to perfectly fit in everywhere

Its innovative circular design can match a multitude of interior designs, so it perfectly fits in everywhere. Its minimalist modern styling creates a sophisticated look and its circular shape stands out beautifully.

5 Spreads more air in more ways

An innovative Booster Fan enables cool air to be expelled at much lower angles. It creates a low pressure area around the outlet, so that cool air comes out parallel to the ceiling and disperses across a wider area.

6 All round simpler, intuitive control

Intuitively control its performance and see where the air is going. The Wireless Remote Controller's^ Jog shuttle and button offer a fun way to adjust the air flow and a Circular LED Display shows its direction.

*Samsung testing compared to a general 4 way cassette type air conditioner. ** Within a 9.3m radius the temperature difference is less than 0.6°C. ^Within a 5m radius, no cold draft between 0~1.5m in height (with 14.0kw).

1 Lighter in weight

Samsung's 4 Way Cassette S is now lighter in weight at 17 Kg. It is the lightest indoor unit in the industry, about 35 lighter than the conventional products. Samsung was the first to apply ABS cabinets into its indoor units to provide the lightest units.

2 Surrounded air flow

The new 4 Way Cassette S can cool every portion of your room. The new and practical design of the blades minimises blind spots at the corners of the panel, and can almost cover a full 360° around the indoor unit.

3 Sanitizes your indoor air

Sanitize your indoor air with Samsung's S-Plasma ion! Priority-filtered air is made even healthier through the S-Plasma ion device which eliminates airborne contaminants, completely eradicates bacteria and eradicates allergies.

4 Efficient cooling at all angles

By using the new remote controller, the opening angles of the 4 blades can be individually set at the same or different angles within a 32° - 65° range for more efficient cooling.

5 Cools at greater distance

Wide blades in the indoor unit deliver cool or warm air at greater distances up to 5.2 meters to provide cooling and heating throughout the room efficiently

6 PM1.0 Filter

The PM1.0 filter is not only effective at capturing ultrafine dust of up to 0.3µm in size, but it also sterilizes up to 99% of the bacteria trapped by the filter using an electrostatic precipitator.

1 Eliminate up to 99% of PM2.5

Keeps air outstandingly pure with 4 step filtration systems. It removes up to 99.9% of ultrafine dust** and harmful gases,^ and eliminates up to 99.7% of harmful allergens.^

2 Pure air, fast and wide

A Front Air Inflow easily draws in air and Dual Power Fans with 4 step filtration systems which powerfully purify and distribute clean air with its 3 Way Air Flow. So it purifies large living rooms faster.

3 Check air quality in realtime

The Air Purity Display lets you see the pollution drop before your eyes! 3 sensors give an exact numeric measurement of the PM2.5 and PM10 levels, and various colour lights visually show them and the harmful gas level.

4 Enjoy fresh air with low energy use

Super Low Mode senses the pollution level and automatically adjusts the power to minimise electricity use and cost. Sleep Mode works softly and quietly, while Speed Mode powerfully refresh a room at the maximum power for 30 minutes.
